PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong algorithmic foundation (Ranked Top 5% on LeetCode). Proficient in architecting scalable applications using MERN stack technologies, with a focus on Backend Engineering, Low-Level Design (LLD), and System Security. Proven ability to deliver production-grade code featuring decoupled services and cloud integration.

EDUCATION

Pranveer Singh Institute of Technology (AKTU) Bachelor of Technology in Computer Science and Engineering Cumulative SGPA: 8.01/10.0 (78.8%) <i>Relevant Coursework:</i> DSA, Operating Systems, DBMS, Computer Networks, OOP, Software Engineering.	Kanpur, India 2023 – 2027
Dr. Virendra Swarup Education Centre Class XII (CBSE Board) Percentage: 77.8% Class X (CBSE Board) Percentage: 89.83%	Kanpur, India 2023 2021

TECHNICAL SKILLS

Languages: C, C++ (STL), JavaScript (ES6+), Python, HTML5, CSS3, SQL
Frontend: React.js, Tailwind CSS, Vite, Redux Toolkit, TanStack Query
Backend: Node.js, Express.js, RESTful APIs, JWT, WebSockets
Databases & Cloud: MongoDB (Mongoose), AWS S3, Redis
Tools: Git, GitHub, Postman, VS Code, Vercel, Figma, CI/CD, Joi/Zod (Validation)
Core Competencies: Data Structures & Algorithms, System Design (LLD), Clean Architecture

PROJECTS

- ImageGram – Scalable Social Media Backend** | *Node.js, Express, MongoDB, AWS S3, Redis*
- Architected a decoupled backend using Layered Architecture (Controller-Service-Repository), ensuring strict separation of concerns and maintainable code structure.
 - Implemented production-grade security using Zod for strict schema validation and Rate Limiting to prevent API abuse, alongside JWT for secure authentication.
 - Developed social features (Posts, Comments, Likes) handling media uploads via AWS S3 (Presigned URLs).
 - Optimized high-traffic endpoints using Redis Caching and Mongoose Aggregation Pipelines to minimize database load and latency.
- Crypto Tracker Dashboard** | *React, Vite, TanStack Query, CoinGecko API*
- Developed a high-performance cryptocurrency dashboard visualizing live market trends via dynamic charting libraries, delivering sub-second data updates.
 - Optimized network efficiency using TanStack Query for server state management, implementing caching, background refetching, and automatic retries.
 - Enhanced rendering performance through React Memoization (useMemo, useCallback) to prevent unnecessary re-renders during high-frequency data streams.
- Kanban Task Manager** | *React, CSS3, LocalStorage API*
- Engineered a Trello-style Task Management application featuring complex Drag-and-Drop functionality for organizing tasks across custom workflow stages.
 - Implemented robust client-side persistence using the LocalStorage API, ensuring state preservation across sessions without backend dependencies.

COMPETITIVE PROGRAMMING

- LeetCode (Top 5%):** Solved 550+ problems across various topics including DP, Graphs, and Trees.
- Consistency:** Awarded the LeetCode 365 Days Badge, demonstrating long-term dedication and disciplined coding habits.
- Problem Solving:** Proficient in optimizing Time and Space Complexity for medium-to-hard challenges.

CERTIFICATIONS

Full Stack Web Development – PW Skills Completed comprehensive training in modern MERN stack development and backend architecture.	Feb 2026
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate Validated proficiency in Artificial Intelligence, Machine Learning fundamentals, and Oracle Cloud AI services.	Oct 2025
Accenture Software Engineering Virtual Internship Forage Simulated real-world engineering tasks including system architecture design, testing, and debugging.	July 2025
